PROFESSIONAL EXPERIENCE

OPERATIONS & SYSTEMS ANALYST | TRIPLE E DIAGNOSTICS

May 2023 – Feb 2025

- Designed and implemented a procurement reconciliation and debit note automation system that improved financial accuracy and reduced manual processing time
- Automated comparison of planned vs. invoiced supplier transactions, improving consistency in supplier billing and dispute resolution
- Generated standardized debit note workflows and automated document outputs (PDF), improving communication efficiency with suppliers
- Built operational dashboards tracking inventory, sales performance, and supplier discrepancies to improve decision-making and reduce stock inefficiencies
- Partnered with finance and procurement teams to improve data integrity, strengthen audit readiness, and support supplier negotiations
- Standardized reporting processes across departments, improving operational visibility and reducing manual reporting workload

OPERATIONS & REPORTING ANALYST | PULJET KONSULT

Sept 2022 – Mar 2023

- Analyzed training operations data to identify inefficiencies in scheduling, participation, and resource allocation
- Developed dashboards in Tableau to track performance metrics and support operational decision-making
- Improved resource planning processes, contributing to measurable cost reduction through optimized training utilization
- Delivered insights on client and program performance to support service improvements and operational planning
- Supported forecasting of training outcomes to improve planning and reduce operational risk

DATA ANALYST | ALL SEASONS ZENITH

Nov 2017 – May 2022

- Conducted performance and market analysis to support operational decision-making across client campaigns
- Analyzed consumer behavior and engagement trends to improve targeting efficiency and resource allocation
- Built reporting dashboards to visualize operational and performance metrics for cross-functional teams
- Improved data quality and reporting consistency through standardization of data handling processes
- Supported operational governance by ensuring accuracy and reliability of business data used for decision-making

SKILLS

Data Analysis & Reporting

- Data analysis for trends, patterns, and business insights
- Power BI and Tableau dashboards for performance tracking
- SQL for data extraction and reporting
- Excel (Pivot Tables, VLOOKUP, data cleaning, reporting)
- Python (Pandas) for analysis and reporting support

Operations & Process Support

- Workflow and process improvement using data insights
- Operational reporting and performance tracking
- Identification of inefficiencies in business processes
- Support for cross-functional operational decision-making

Communication & Collaboration

- Reporting insights to stakeholders for decision support
- Cross-functional collaboration on business requirements
- Translating data into clear operational insights
- Team-based reporting and documentation tools (GitHub, etc.)

CERTIFICATIONS

- Google Data Analytics Professional Certificate.
- Machine Learning Engineering for Production (MLOps).
